

# Tupperware Food Safety Tips Shifting Sands Dining Facility

- Practice good hand hygiene: Wash your hands thoroughly for at least 20 seconds with warm water or use an antimicrobial hand sanitizer before transferring food items from this transfer station.
  - Keeping your hands clean is the easiest way to minimize bacterial contamination.
- Tupperware must be clean and serviceable to minimize or eliminate cross-contamination.
- Do not bring personal food items inside the DFAC from outside sources.
- Discard foods that have not been consumed or refrigerate or freeze leftovers within 2 hours or sooner in clean, shallow, covered containers to prevent harmful bacteria from multiplying.
- For additional food safety tips, please go to the following website: [www.foodsafety.gov](http://www.foodsafety.gov)

# Things to Remember...

- ▶ Personal to-go container use is permitted and encouraged in uniform or civilian attire
- ▶ Patrons who wish to use the Tap & Go option must use a dine-in plate and then transfer their food to their own previously sanitized container(s)
- ▶ Food transfer is permitted at the dining tables and dine-in plates are to be bussed to the food tray carts.
- ▶ Patrons must dine-in or take-out. Dining in and taking food to-go is not permitted.
